

OWEN ROAD CROSSING OPTION 1

Extend island: - To provide safer / clearer line of sight from behind parked vehicles for crossing

Repaint existing speed humps

Extend and widen island, creating planting areas: - To provide a safer / clearer line of sight from behind parked vehicles for crossing. Planting also provides a barrier between vehicles and pedestrians.

Raised Zebra Crossing with ramped cobblestones: - To slow vehicles, low maintenance.

Repaint existing speed humps

New Stone Walls either side of zebra crossing to match existing walls on the opposite side: - Offers protection from road edge for pedestrians gathering around the café, and replaces parking on the café side.

OWEN ROAD CROSSING OPTION 1

DRAFTING
and some

OPTION 1: -

1. Raised zebra crossing with ramped cobblestones (*no maintenance, would slow vehicles*)
2. Extend and widen island, creating planting areas (*safer / clearer line of sight from behind parked vehicles for crossing, pleasing aesthetically, needs maintenance*)
3. New Stone Walls either side of zebra crossing to match existing walls on the opposite side (*permanent fixture, no maintenance, pleasing aesthetically, offers protection from road edge, replaces parking outside cafe*) Concerns that children would sit on wall facing the road, wall could be slanted towards the café to prevent this.
4. Existing Speed Ramps to be painted
5. Provision of Bike Racks. Review, upgrade plantings.
