

# OWEN ROAD CROSSING OPTION 2

Island becomes Designated Bike Parking:  
- Existing islands do not provide safe / clear line of sight from behind parked vehicles for crossing. Due to new zebra crossing this could become a designated bike parking area preventing crossing with raised planters

Repaint existing speed humps

Extend and widen island, creating planting areas: - To provide a safer / clearer line of sight from behind parked vehicles for crossing. Raised Planters to provide a physical barrier between vehicles and pedestrians.

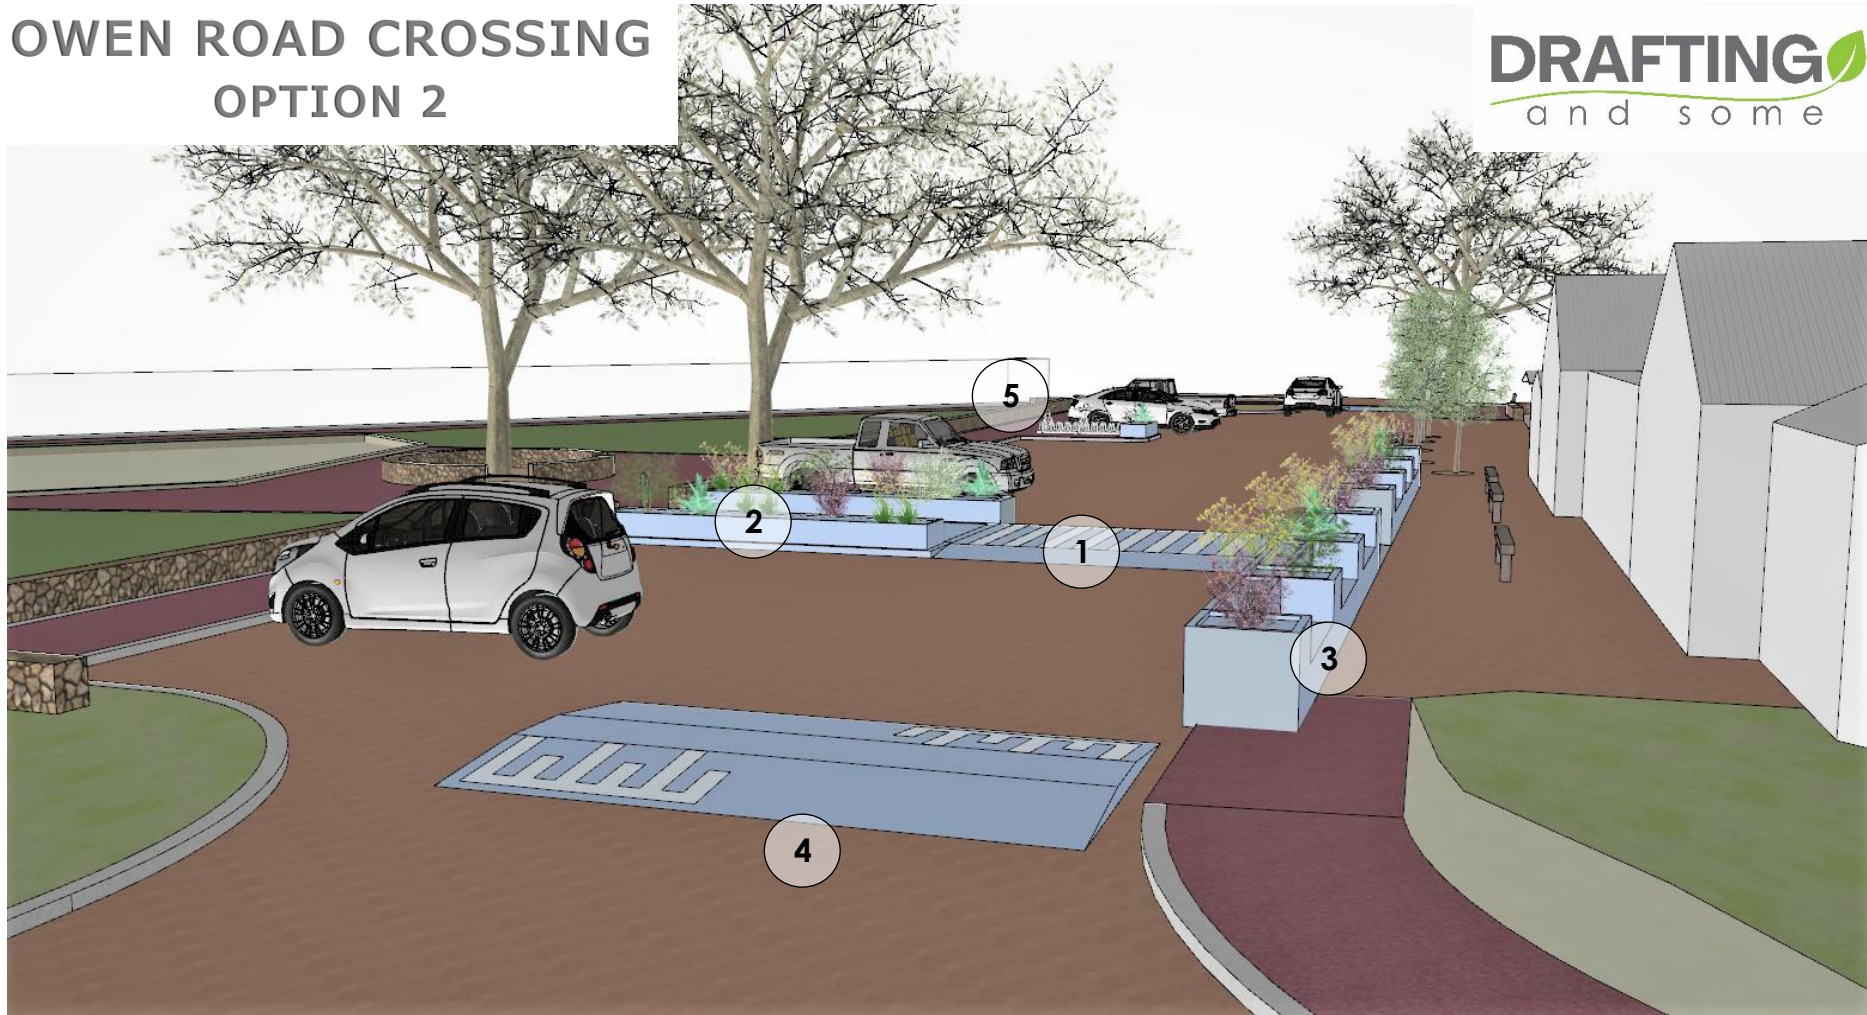

Raised Zebra Crossing with ramped cobblestones: - To slow vehicles, low maintenance.

Repaint existing speed humps

New Timber Barrier incorporating planters and bench seats either side of zebra crossing to match planters on the opposite side: - Offers protection from immediate road for pedestrians gathering around the café, and replaces parking on the café side.

Planting

# OWEN ROAD CROSSING OPTION 2

## OPTION 2: -

1. Raised zebra crossing with ramped cobblestones (*no maintenance, would slow vehicles*)
2. Extend and widen island, incorporate raised planter boxes (*safer / clearer line of sight from behind parked vehicles for crossing, pleasing aesthetically, needs maintenance, physical barrier between parked vehicles and crossing*)
3. New Timber feature barrier incorporating planters and bench seating either side of zebra crossing to match planters on the opposite side. Provides safe seating facing away from the road (*permanent fixture with a lifespan, some maintenance, pleasing aesthetically, offers protection from road edge, replaces parking outside the cafe*)
4. Existing Speed Ramps to be painted
5. Provision of Bike Racks and raised planter box on second island to discourage use as a crossing point.
