

OWEN ROAD CROSSING OPTION 3

Extend Island: - To provide safer / clearer line of sight from behind parked vehicles for crossing

Repaint existing speed humps

Extend and widen island, incorporating bike racks and/or planter box: - To provide a safer / clearer line of sight from behind parked vehicles for crossing. Raised Planters / bike racks provide a physical barrier between vehicles and pedestrians.

No specific Zebra Crossing but use of cobblestones between existing ramps to indicate high pedestrian use / slow vehicle movement.

Repaint existing speed humps

New Stone Wall to match existing but with a feature curve rather than straight, as in option 1. Could incorporate planting (permanent fixture, low maintenance, offers protection from road edge)

Planting

OWEN ROAD CROSSING OPTION 3

OPTION 3: -

1. Cobblestones or similar between existing speed ramps rather than a specific zebra crossing. To indicate high pedestrian use area, slow traffic.
2. Extend and widen island, incorporate raised planter boxes and/or bike racks (*safer / clearer line of sight from behind parked vehicles for crossing, pleasing aesthetically, needs maintenance, physical barrier between parked vehicles and crossing*)
3. New Stone Wall to match existing but with a feature curve rather than straight, as in option 1, either side of zebra crossing. Could incorporate planting (*permanent fixture, minimal maintenance, pleasing aesthetically, offers protection from road edge, replaces parking outside the cafe*)
4. Existing Speed Ramps to be painted
